MEMORANDUM FOR: Director of Logistics

THROUGH : Deputy Director for Science and Technology *13/22 8/23*
Deputy Director for AdministrationFROM : R. P. Hazzard
National Photographic Interpretation Center

SUBJECT : Post 1985 NPIC Space Requirements

1. Substantial renovation and reconfiguration of [] are being undertaken as an integral part of the NPIC Development Program (NDP). This effort affects virtually all of the space [] associated with operations and operations support and is designed to provide an efficient and functional working environment for NPIC and its tenant organizations. These plans include utilization of the new addition, extensive use of raised flooring and modular furniture and incorporate the latest federal and Agency space assignment criteria. The plans are being developed by a professional architectural and engineering firm retained for this purpose. As stated, the emphasis is on efficiency and function.

2. This planning effort already demonstrates that [] including the new addition, will be adequate to house current and projected operations through 1985. It is just as clear that post 1985 personnel increases and equipment installations associated with the NDP exceed [] space resources.

3. Obviously, space planning for the post 1985 period must include some unknown and is subject to revision. Notwithstanding this caveat, in order to exploit the products of new collection systems NPIC currently has programmed an increase of approximately 400 personnel and 30 IDEX stations during the period 1986-1989. There will also be an expansion of certain support and administrative areas which cannot be accurately sized at this time. However, a pro-rata extension [] 1985 occupancy projects a minimum requirement for 85,000 sq. ft. of additional space.

4. It is understood that OIA/DDI will move [] to Headquarters sometime between August 1986 and May 1987. We propose to utilize the space presently occupied by OIA to satisfy approximately 38,000 sq. ft. of NPIC's space requirement. We propose to satisfy the balance of the require-
